

**Patrick M. Brunner, MD, MSc**

Associate Professor of Dermatology  
Director, Cutaneous Lymphoma Clinic  
The Kimberly and Eric J. Waldman Department of  
Dermatology

Dr. Brunner obtained his MD degree from the Medical University of Vienna, Austria. He completed his residency in Dermatology at the Department of Dermatology at the Medical University of Vienna (General Hospital Vienna), under the mentorship of Dr. Georg Stingl. Afterwards, Dr. Brunner joined the Laboratory for Investigative Dermatology at The Rockefeller University in New York, obtaining a Master's Degree in Clinical and Translational Sciences, and performed research on atopic dermatitis under the mentorship of Drs. Emma Guttman and James G. Krueger. In 2018, he returned to Vienna to build a research group focusing on cutaneous immunobiology of chronic inflammatory skin diseases and primary cutaneous lymphomas, to better understand how individual immune cells orchestrate skin inflammation in benign and malignant conditions. In 2021, he joined the Icahn School of Medicine at Mount Sinai as Associate Professor of Dermatology and Director of the Cutaneous Lymphoma Clinic at the The Kimberly and Eric J. Waldman Department of Dermatology. As a clinician scientist with a strong interest in skin immunology, he is seeing patients suffering from primary cutaneous immune cell malignancies, and also has a general interest in chronic inflammatory skin diseases such as vitiligo, atopic dermatitis, alopecia areata and scarring alopecias. His research is aimed at a better understanding of the tumor immunobiology in cutaneous lymphomas, and to develop better treatment modalities for this patient population.
